TURK EKONOMI BANKASI ANONIM SIRKETI REVIEW REPORT AS OF SEPTEMBER 30, 2005

To The Board of Directors of Turk Ekonomi Bankasi A.S.

We have reviewed the balance sheet of Turk Ekonomi Bankasi Anonim Sirketi (the Bank) as of September 30, 2005 and the related statements of income, changes in shareholders' equity and cash flows for the interim period then ended. These financial statements are the responsibility of the Bank's management. Our responsibility as independent auditors is to issue a review report on these financial statements based on our review.

We conducted our review in accordance with the auditing standards which were determined under the provisions of Banking Law Number 4389. These standards require that the review should be planned and performed to obtain limited assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquires of bank personnel and analytical procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and, accordingly we do not express an opinion.

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements do not present fairly, in all material respects, the financial position of Turk Ekonomi Bankasi Anonim Sirketi at September 30, 2005 and the results of its operations and its cash flows for the interim period then ended in accordance with the accounting principles and standards that are based on the Article 13 of the Banking Law.

Additional paragraph for convenience translation to English:

The above mentioned accounting principles differ from International Financial Reporting Standards (IFRS) issued by International Accounting Standards Board. The effects of the differences between these accounting principles and accounting principles generally accepted in the countries in which the accompanying financial statements are to be used and IFRS have not been quantified in the accompanying financial statements. Such differences primarily related to the accounting for the effects of hyperinflation, deferred taxes, employee termination benefits and presentation. Accordingly, the accompanying financial statements are not intended to present the financial position and results of operations and cash flows in accordance with the accounting principles generally accepted in the countries of users of the financial statements and IFRS. The Bank's consolidated financial statements prepared in accordance with the accounting principles and standards that are based on the Article 13 of the Banking Law number 4389 will be issued separately.

TURK EKONOMI BANKASI A.S.
NOTES TO FINANCIAL STATEMENTS FOR THE INTERIM PERIOD ENDED
AS OF SEPTEMBER 30, 2005
(Currency-Thousands of New Turkish lira)

SECTION THREE

ACCOUNTING PRINCIPLES

I- Basis of Presentation

The Bank prepares its financial statements in accordance with the "Accounting Application Regulations" (AAR) based on Article 13 named as "Accounting and Recording System" of the Banking Law 4389 and related communiqués and related explanations and further communiqués that add or cause a change on the content of the relevant communiqués.

Restatement of Financial Statements to The Current Period Purchasing Power

In accordance with the declaration of the Banking Regulation and Supervision Agency (BRSA) numbered 1623 and dated April 21, 2005 and the circular dated April 28, 2005, banks are not required to apply in their financial statements The "Accounting Standard on Financial Statements at Hyperinflation Periods" since the indicators defined in Article 5 of the Communiqué are not deemed to be applicable. Accordingly, starting from January 1, 2005 inflation accounting has not been applied and, prior period financials are expressed in purchasing power of December 31, 2004 for comparative presentation purposes.

As a result of a long period of high inflation, the TL has ended up in large denominations, creating difficulty in expressing and recording transactions. A new law was enacted in January 31, 2004 to introduce Yeni Turk Lirasi (New Turkish Lira, YTL), as the new currency unit for the Republic of Turkey effective January 1, 2005. Conversion rate for TL against YTL is fixed at YTL 1 to TL 1,000,000 through out the one year period until complete phase-out of TL. Effective January 1, 2005 the Bank's functional and presentation currency is YTL and current period financial statements together with prior period/year comparative figures is presented in thousands of YTL, in accordance with BRSA's circular dated January 5, 2005.

Other Basis of Valuation

Basis of valuation used for assets and liabilities in the preparation of financial statements are explained in the accounting principles for the related assets and liabilities.

Changes in Accounting Policies and Valuation Methods in the Current Period

Accounting policies that are applied in the preparation of year-end financials except for the application of inflation accounting with respect to Communiqué No:14 of AAR for interim financial statements, are used without any change and summarized in III. Section.

II- Explanations on Forward and Option Contracts and Derivative Instruments

In the absence of forward foreign currency market rates and reliable forward rate estimations in a volatile market, values of foreign currency forward, swap transactions are determined by comparing the period end Bank foreign exchange rates with the forward rates discounted to the balance sheet date. The resulting gain or loss is reflected to the income statement. In determination of the fair values of interest rate swaps, discounted values calculated using the fixed and floating interest rates between the transaction date and repricing date are used. Fair value of option transactions are determined by comparing the option rates discounted to balance sheet with the period end foreign exchange rates of the Bank and the resulting gain or loss is reflected to the income statement taken into account of exercisability of the option. Premiums, received and paid for the option transactions, are calculated on accrual basis using IRR method. Also the Bank has entered into future agreements. Future transactions are valued daily by the primary market prices and related gains or losses are reflected in income statement.

There are no embedded derivatives separated from the host contract or that are designated as hedging instruments.

AS OF SEPTEMBER 30, 2005 (Continued)

Foreign Currency Assets and Liabilities

Gains or losses arising from foreign currency transactions are reflected in the statement of income as they are realized during the period. Foreign currency assets and liabilities at each period-end are translated into Turkish lira at the period-end foreign exchange buying rates announced by the Bank and the resulting foreign exchange gains or losses are recorded in the income statement as foreign exchange gain or loss. The net investment in foreign entities as of the related period-ends were translated into Turkish lira by applying the exchange rates prevailing at respective dates. The resulting foreign exchange gains or losses are recorded in the income statement.

III- Offsetting of Financial Assets and Liabilities

Financial assets and liabilities are offset when the Bank has a legally enforceable right to set off, and when the Bank has the intention of collecting or paying the net amount of related assets and liabilities or when the Bank has the right to off set the assets and liabilities simultaneously.

IV- Interest Income and Expense

Interest income and expense are recognized in the income statement for all interest bearing instruments on an accrual basis using the effective interest method. In accordance with the related regulation, the due and not due interest accruals of the non-performing loans are reversed and interest income related to these loans are recorded as interest income only when collected.

V- Fees and Commission Income and Expense

Fees for various banking services are recorded as income when collected and prepaid commission income is recorded as income by using effective interest rate in the related period.

Fees and commissions for funds borrowed paid to other financial institutions, as part of the transaction costs, are recorded as prepaid expenses and expensed on a monthly basis.

The dividend income is reflected to the financial statements on cash basis when the profit distribution is realized by the associates and subsidiaries.

VI- Securities Held for Trading

Trading securities are securities which were either acquired for generating a profit from short-term fluctuations in price or dealer's margin, or are securities included in a portfolio in which a pattern of short-term profit taking exists.

Trading securities are initially recognized at cost. Transaction costs of the related securities are included in the initial cost. The positive difference between the cost and fair value of such securities is accounted for as interest and income accrual, and the negative difference is accounted for as "Provision for Decrease in Value of Marketable Securities".

VII- Sales and Repurchase Agreements and Lending of Securities

The sales and purchase of government securities under repurchase agreements made with the clients are recorded in balance sheet accounts in accordance with the Uniform Chart of Accounts. Accordingly in the financial statements, the government bonds and treasury bills sold to clients under repurchase agreements are classified under securities held for trading, available for sale and held to maturity depending on the portfolio they are originally included in and are valued according to the valuation principles of the related portfolios. Funds obtained from repurchase agreements are classified as a separate sub account under money markets borrowings account in the liabilities. The interest expense accruals are calculated using the effective interest method for the funds obtained under repurchase agreements and are reflected to the interest and other expense accruals account in the balance sheet.

The above-mentioned transactions are short-term and consist of domestic public sector debt securities.

The income and expenses generated from above mentioned transactions are reflected to the "Interest Income on Marketable Securities" and "Interest Expense on Marketable Securities subject to Repurchase Agreement" accounts in the income statements.

As of September 30, 2005, the Bank does not have any reverse repo transactions (December 31, 2004 - None).

As of September 30, 2005, the Bank does not have any lent marketable securities (December 31, 2004 - None).

VIII- Securities Held to Maturity, Securities Available for Sale and Bank Originated Loans an Receivables

Securities held to maturity include securities with fixed or determinable payments and fixed maturity where there is intention of holding till maturity and the relevant conditions for fulfillment of such intention, including the funding ability exist. This portfolio excludes bank originated loans and receivables.

Securities available for sale include all securities other than bank originated loans and receivables, securities held to maturity and securities held for trading.

The marketable securities are initially recognized at cost including the transaction costs.

After the initial recognition, available for sale securities are measured at fair values and the unrealized gain/loss originating from the difference between the initial cost and the fair value is recorded in "Securities Value Increase Fund" under the equity. The difference between fair value and amortized cost of investments by using effective interest rate method is considered while calculating value increase/decrease of investments. Fair values of debt securities that are traded in an active market are determined based on quoted prices or current market prices. In the absence of prices formed in an active market the fair values of these securities are determined using other valuation methods stated in the articles of the AAR's Communiqué No:1, "Accounting Standards of Financial Instruments."

Loans and receivables originated by the Bank are those generated by lending money and exclude those that are held with the intention of trading or selling in near future.

Held to maturity securities are remeasured at amortized cost by using original effective interest rate and reserve for impairment in value is provided, if any.

The interests received from securities held to maturity are recorded as interest income. There are no dividends related with any marketable securities that are held to maturity.

There are no financial assets that were previously classified as securities held to maturity but cannot be currently classified as held to maturity for two years due to "tainting" rules.

AS OF SEPTEMBER 30, 2005 (Continued)
(Currency-Thousands of New Turkish lira)

The Bank classifies securities according to above-mentioned portfolios at the acquisition date of related security.

The sale and purchase transactions of the securities held to maturity are recorded at the settlement dates.

IX- Investments in Associates

Turkish Lira Investments in associates which are quoted at the stock exchange are remeasured at fair value based on quoted bid prices and any positive difference between fair value price and cost is included under shareholders' equity at "Marketable Securities Value Increase Fund" account in the financial statements. Unquoted investments in associates are reflected at restated costs until December 31, 2004, computed by using relevant conversion factors considering purchase and capital contribution dates excluding share capital increases from internally generated funds such as the revaluation fund. A provision is set when there is evidence for permanent impairment in value of the related asset.

X- Investments in Subsidiaries

Turkish lira investments in subsidiaries are reflected at restated costs until December 31, 2004, computed by using relevant conversion factors considering purchase and capital contribution dates excluding share capital increases from internally generated amounts such as the revaluation fund. Foreign currency denominated subsidiaries are valued with period-end foreign exchange rates. A provision is set when there is evidence for permanent impairment in value of the subsidiaries.

XI- Originated Loans and Receivables and Provisions for Impairment

The Bank initially records originated loans and receivables at cost. In the subsequent periods, in accordance with the AAR, Communiqué No:1, these loans are remeasured at amortized cost using effective interest rate method.

Cash loans are recorded in accordance with the regulations stated in the Communiqué on the Uniform Chart of Accounts and Its Explanations.

Provision is set for the loans that may be doubtful and the amount is expensed at the current period. The provisioning criteria for the non-performing loans are determined by the Bank's management for compensating the probable losses of the current loan portfolio, by means of evaluating the portfolio for its quality and risk factors and by means of considering the economical conditions, other facts and related regulations.

Specific reserves are computed and provided for Group III, IV and V loans in accordance with the Banking Law No.4389 as revised by Law Number 4672, Article 3, Sub Article 11 and Article 11, Sub Article 12 published on the Official Gazette No. 24448 dated June 30, 2001 on "Methods and Principles for the Determination of Loans and Other Receivables to be Reserved for and Allocation of Reserves" amended by Communiqués published on the Official Gazette No:34657 date January 31, 2002. These provisions are reflected in the income statement under "Provision and Impairment Expenses - Special Provision Expense". The collections made regarding these loans are first deducted from the principal amount of the loan and the remaining collections are deducted from interest receivables.

The collections made related to loans for which provision is made in the current period are deducted from the "Provision for Loans and Other Receivables" account in the income statement. The collections made related to loans written off or for which provision was made in prior years are recorded under "Other Operating Income" account and related interest income is recorded under the "Interest Received from Non-performing Loans" account.

Releases of loan provisions are recorded in the "Provision and Impairment Expenses - Special Provision Expense" account as income.

XII- Goodwill and Other Intangible Assets

There is no goodwill regarding the investments in associates and subsidiaries.

The intangible assets are reflected at restated costs until December 31, 2004 in accordance with inflation accounting and are depreciated with straight-line method. The cost of assets subject to depreciation is restated after deducting the exchange differences, capitalized financial expenses and revaluation increases, if any, from the cost of the assets.

The intangible assets of the Bank comprise mainly softwares. The requirements of the Turkish Tax Procedural Code are taken into consideration in determining the useful lives and no other specific criteria are used. Useful lives of such assets acquired prior to 2004 are determined as 5 years and for the year 2004 and forthcoming years, as 3 years. Software used are mainly developed within the Bank by the Bank's personnel and the related expenses are not capitalized. Software is purchased only in emergency cases and for special projects.

There are no anticipated changes in the accounting estimates about the depreciation rate and method and residual values that would have a significant impact in the current and future periods.

XIII- Tangible Fixed Assets

Buildings are reflected at their restated costs until December 31, 2004, less reserve for impairment, if any. The straight-line method of depreciation is used for buildings and useful life is considered as 50 years.

Other tangible fixed assets are reflected at their restated costs until December 31, 2004 and depreciated by straight-line method. A prorate basis is used for depreciation of assets held less than one year as of the balance sheet date. Leasehold improvements are depreciated over the lease period by straight-line method. The annual rates used, which approximate rates based on the estimated economic useful lives of the related assets, are as follows:

	%
Buildings	2
Motor vehicles	20
Furniture, fixtures and office equipment and others	5-50
Leasehold improvements	Lease period

Gain or loss resulting from disposals of the tangible fixed assets are reflected to the income statement as the difference between the net proceeds and net book value.

Repairment costs of the tangible fixed assets are capitalized if they extend the economic useful life of the related asset. Other repairment costs are expensed. There are no pledges, mortgages or other restrictions on the tangible fixed assets.

There are no purchase commitments related to the tangible fixed assets.

There are no anticipated changes in the accounting estimates, which could have a significant impact in the current and future periods.

XIV- Leasing Transactions

Tangible fixed assets acquired by financial leases are accounted in accordance with AAR, Article 7 of the Communiqué No:4, "Accounting Standard for Leasing Transactions." In accordance with the above-mentioned article, the leasing transactions, which consist only foreign currency liabilities, are translated to Turkish lira with the exchange rates effective at the transaction dates and they are recorded both as an asset and a liability. The foreign currency liabilities are translated to Turkish lira with the Bank's period end exchange rate. The increases/decreases resulting from the differences in the foreign exchange rates are recorded as expense/income in the relevant period. The financing cost resulting from leasing is distributed through the agreement period to form a fixed interest rate.

In addition to the interest expense, the Bank provides depreciation expense for the leased assets in each period. The depreciation rate is determined in accordance with "Accounting Standard for Tangible Fixed Assets" and the depreciation rate used is 20%.

Operating lease payments are recognized as expense in the income statement on a straight line basis over the lease term.

The Bank does not have any leasing transactions as lessor.

XV- Provisions and Contingent Liabilities

The provisions and contingent liabilities are determined in accordance with the Communiqué No:8 of AAR, except for the general and specific provisions set for the loans and other receivables. Provisions are recognized for present obligations as a result of past events immediately at the estimated amounts.

XVI- Liabilities Regarding Employee Benefits

In accordance with the existing social legislation, the Bank is required to make lump-sum termination indemnities including retirement and notice payments to each employee whose employment is terminated due to retirement or for reasons other than resignation or misconduct. The retirement pay is calculated for every year worked in the Bank over the salary for 30 days and the notice pay is determined by the relevant notice period time calculated over the years worked in the Bank. In accordance with AAR, Communiqué No:10, the Bank sets provision for retirement, notice pay and vacation pay liabilities by taking the actual payment rates for the previous 5 years into consideration.

The Bank has no employees contracted for determined periods.

As of September 30, 2005 and December 31, 2004, the arithmetic average of the actual payments realized for the previous five years are 8.35% and 8.54% respectively and this forms the base of the provision amount that is set for the retirement and notice pay liabilities.

The Bank employees are members of Tebliler Foundation. The Bank does not have any other liability to this foundation other than paying 20 % of the first monthly contribution fee of the employee.

There are no liabilities that require additional provisions related to other employee rights.

XVII- Taxation

Corporate tax

Beginning with 2003, the effective corporation tax rate is 30% in accordance with Law No. 4842, published on April 24, 2003. However, with Law No. 5035 published at January 2, 2004, only for the year 2004 the corporation tax was calculated at 33%. The corporate tax rate for 2005 is 30%

The tax legislation, provides for a temporary tax of 30% (2004-33 %) to be calculated and paid based on earnings generated for each quarter. The amounts thus calculated and paid are offset against the final tax liability for the year.

Tax returns are required to be filed until the fifteenth of the fourth month following the balance sheet date and paid in one installment until the end of the related month.

In 2004 corporation tax was computed on the statutory income tax based on inflation adjusted statutory financial statements prepared in accordance with Law No. 5024 related with changes in Procedural Tax Code, Income Tax Law and Corporation Tax Law and reflected in the accompanying financial. In the Tax Procedural Code Circular number 21, dated October 17, 2005; Republic of Turkey Ministry of Finance General Directorate of Revenues announced that inflation accounting will not be applied in the third quarterly temporary tax period of 2005, the wholesale price indices announced for March 2005 did not increase more than 10 % compared to April 2004 and three year cumulative inflation rate from April 1, 2002 did not exceed 100 %.

Current tax related with items that are credited or charged directly to equity are charged or credited to equity. YTL 741 of current tax liability, relating to items classified under equity is charged to "Marketable securities value increase fund"

Tax losses can be carried forward for a maximum period of five years following the year in which the losses were incurred. The tax authorities can inspect tax returns and the related accounting records for a retrospective maximum period of five years.

Deferred tax

As of June 30, 2004 and prior periods, the Bank calculated and reflected deferred tax asset or liability on timing differences which will result in taxable or deductible amounts in determining taxable profit of future periods.

As of September 30, 2005 and December 31, 2004, in accordance with Communiqué Number 18 of AAR published on August 12, 2004 and effective from July 1, 2004 and the circular of BRSA numbered BDDK.DZM.2/13/1-a-3 dated December 8, 2004 the Bank calculated deferred tax asset on all deductible temporary differences except for general loan reserve, if sufficient taxable profit in future periods to recover such amounts is probable; as well as deferred tax liability on all taxable temporary differences. Deferred tax asset and liabilities are shown in the accompanying financial statements on a net basis.

The deferred tax asset net is included in other assets and deferred tax liability net is reflected under other external resources on the balance sheets. YTL 3,585 of deferred tax provision credit is stated under the tax provision in the income statement. YTL 826 of deferred tax asset resulting from differences related to items that are credited or charged directly to equity is netted with these accounts.

Furthermore, as per the above mentioned circular of BRSA, deferred tax income balance resulting from netting of deferred tax assets and liabilities should not be subjected to dividend distribution and capital increase.

SECTION FOUR

INFORMATION ON FINANCIAL STRUCTURE

I- Capital Adequacy Standard Ratio

The method used for risk measurement for capital adequacy standard ratio; Capital Adequacy Standard Ratio is calculated in accordance with the Communiqué on "Measurement and Assessment of Capital Adequacy of Banks", which was published on January 31, 2002 in the Official Gazette numbered 24657. As of September 30, 2005, the Bank's capital adequacy ratio is 13.75% (December 31, 2004 - 14.29%).

In the computation of capital adequacy standard ratio, information prepared in accordance with statutory accounting requirements are used. Additionally, the market risk amount is calculated in accordance with the communiqué on the "Internal Control and Risk Management Systems of the Banks" and is taken into consideration in the capital adequacy standard ratio calculation.

The values deducted from the capital in the shareholders' equity computation are not considered while calculating risk-weighted assets, non-cash loans and contingent liabilities. Assets subject to depreciation and depletion among risk-weighted assets are included in the calculations over their net book values after deducting the relative depreciations and provisions.

While calculating the basis of non-cash loans subject to credit risk, the net receivable amount from the counter parties found by means of deducting the provision amount set in accordance with the "Communiqué on Methods and Principles for the Determination of Loans and Other Receivables to be Reserved for and Allocation of Reserves" is multiplied by the rates presented at the Clause 1, Article 21 of the "Communiqué on Regulations on the Establishment and Operations of Banks", and included in the related risk group and weighted by the related group's risk.

Receivables from counter parties generated from derivative foreign currency and interest rate transactions are included in the related risk group at the loan conversion rates stated in Clause 2, Article 21 of the "Communiqué on Regulations on the Establishment and Operations of Banks" and weighted for a second time by the weight of the related risk group.

II- Market Risk

The Bank has established market risk management operations and taken the necessary precautions in order to hedge market risk within its financial risk management purposes, in accordance with the Communiqués on "Internal Control and Risk Management Systems of Banks", and "Measurement and Assessment of Capital Adequacy of Banks".

The Board of Directors determines the limits for the basic risk that the Bank is exposed to. Those limits are revised periodically in line with the strategies of the Bank. Additionally, the Board of Directors has ensured that the risk management division and senior management has taken necessary precautions to describe, evaluate, control and manage risks faced by the Bank.

The interest rate and exchange rate risks of the financial positions taken by the Bank related to balance sheet and off-balance sheet accounts are measured and while calculating the capital adequacy, the amount subject to VAR is taken into consideration by the standard method. VAR for Market risks using international models Scenario analysis and stress tests are calculated and such tests supported by results are reported to senior management.

III- Foreign Currency Risk

Foreign currency risk indicates the probabilities of loss that banks are subject to due to the exchange rate movements in the market. While calculating the share capital requirement, all foreign currency assets, liabilities and forward transactions of the Bank are taken into consideration and value at risk is calculated by using the standard method.

The Board of Directors sets limits for the positions, which are followed up daily. Also any possible changes in the foreign currency transactions in the Bank's positions are monitored.

As an element of the Bank's risk management strategies, foreign currency liabilities are hedged against exchange rate risk by derivative instruments.

The Treasury Department of the Bank is responsible for the management of Turkish Lira or foreign currency price, liquidity and affordability risks that could occur in the domestic and international markets within the limits set by the Board of Directors. The monitoring of risk and risk related transactions occurring in the money markets is performed daily and reported to the Bank's Asset-Liability Committee.

As of September 30, 2005, the Bank's net short position is YTL 6,818 (December 31, 2004 - YTL 3,006 net short) resulting from short position amounting to YTL 224,961 (December 31, 2004 - YTL 52,455) on the balance sheet and long position amounting to YTL 218,143 (December 31, 2004 - YTL 49,449) on the off-balance sheet.

IV- Interest Rate Risk

Interest rate risk shows the probability of loss related to the changes in interest rates depending on the Bank's position, and it is managed by the Asset-Liability Committee. The interest rate sensitivity of assets, liabilities and off-balance sheet items related to this risk are measured by using the standard method and included in the market risk for capital adequacy.

The first priority of the Bank's risk management is to protect from interest rate volatility. All types of sensitivity analysis performed within this context is calculated by the risk management and reported to the Asset-Liability Committee.

Simulations on interest income are performed in connection with the forecasted economic indicators used in the budget of the Bank. The negative effects of the fluctuations in the market interest rates on the financial position and the cash flows are minimized by revising budget targets.

The Bank management follows the market interest rates daily and revises the interest rates of the Bank when necessary.

Since the Bank does not permit maturity mismatches or imposes limits on the mismatch, it is not expected for the Bank to be exposed to a significant interest rate risk.

Information related to the interest rate sensitivity of assets, liabilities and off-balance sheet items (based on repricing dates):

V- Liquidity Risk

Liquidity risk occurs when there is insufficient cash or cash inflows to meet the cash outflows completely and timely.

Liquidity risk may also occur when the market penetration is not adequate, when the open positions cannot be closed quickly at suitable prices and sufficient amounts due to barriers and break-ups at the markets.

The Bank's policy is to establish an asset structure that can meet all kinds of liabilities by liquid sources at all times. In this context liquidity problem is not faced in any period. In order to maintain this the Board of Directors of the Bank continuously determines standards for the liquidity ratios, and monitors them.

According to the general policies of the Bank, the matching of the maturity and interest rate structure of assets, and liabilities is always established within the asset liability management strategies. A positive difference is tried to be established between the yields of YTL and foreign currency assets and liabilities on the balance sheet and their costs. According to this strategy, the Bank manages its maturity risk within the limits determined by Bank's Management.

When the funding and liquidity sources are considered, the Bank covers majority of its liquidity need by deposits, and in addition to this source, it makes use of prefinancing and syndication products to generate additional sources. Generally the Bank's position is lender position.

VII- Footnotes And Explanations on Inflation Accounting

Inflation Accounting

In accordance with the declaration of the Banking Regulation and Supervision Agency (BRSA) numbered 1623 and dated April 21, 2005 and the circular dated April 28, 2005, banks are not required to apply The "Accounting Standard on Financial Statements at Hyperinflation Periods", Communiqué No:14 of "Accounting Application Regulations" (AAR) in their financial statements as the indicators defined in Article 5 of the Communiqué are not deemed to be applicable. Accordingly, starting from January 1, 2005 inflation accounting has not been applied, and prior period financials are expressed in purchasing power of December 31, 2004 for comparative presentation purposes.

The main guidelines for inflation accounting on prior period financials presented for comparison purposes only (balance sheet as of December 31, 2004 and income statement as of September 30, 2004) are as follows:

Cash and monetary assets and liabilities, which maintain their nominal balances but experience a decline in purchasing power were not restated because they were already expressed in terms of the monetary unit current at that balance sheet date.

Non-monetary asset and liabilities and components of which were not expressed in terms of the measuring unit current at the balance sheet dates were restated by applying a general price index. Cash proceeds in share capital increases were restated based on collection dates whereas increases through revaluation fund were eliminated. Share capital increases made through the transfer of retained earnings, income generated through the sales of properties and of associates and subsidiaries and unappropriated profits were considered as cash injections made by the shareholders and were restated based on the date of transfer to the share capital.

Non-monetary items which were subject to depreciation were restated after eliminating the related revaluation effects. Since depreciation was computed over restated amounts, the charge in the income statements was not subject to restatement.

Non-monetary items reflected at current values were not restated since they were already stated in the current purchasing power.

Participations and subsidiaries denominated in Turkish Lira were reflected at restated costs by converting historical acquisition costs, excluding free shares from revaluation fund, with the relevant conversion factors. Transfers to share capital from general reserves, gain on sale of property and investments and unappropriated profits were considered as cash contributions and were restated from the date of contribution. Participations and subsidiaries denominated in foreign currency were converted to Turkish Lira with the exchange rates prevailing and year-end.

All items in the statement of income were restated by applying the relevant monthly average conversion factors on accrual dates.

The gain or loss on net monetary position was included in the income statement as gain/loss on net monetary position. Restatement effect of paid-in capital was stated as a separate line item under equity.

(CONVENIENCE TRANSLATION OF A REPORT AND FINANCIAL STATEMENTS ORIGINALLY ISSUED IN TURKISH - SEE SECTION III, NOTE XXIII)

TURK EKONOMI BANKASI A.S. NOTES TO FINANCIAL STATEMENTS FOR THE INTERIM PERIOD ENDED AS OF SEPTEMBER 30, 2005 (Continued) (Currency-Thousands of New Turkish lira)

Wholesale prices indices and conversion factors that were used to restate the accompanying the financial statements as of December 31, 2004, reflecting the restatement for the changes in the general purchasing power of the Turkish is as follows;

Dates	Indexed	Conversion Factors
December 31, 2004	8,403.8	1.000
September 30, 2004	8,069.7	1.041
December 31, 2003	7,382.1	1.138
December 31, 2002	6,478.8	1.297

Restatement of balance sheet and income statement items through the use of a general price index and relevant conversion factors does not necessarily mean that the Bank could realize or settle the same values of assets and liabilities as indicated in the balance sheets. Similarly, it does not necessarily mean that the Bank could return or settle the same values of equity to its shareholders.

Information regarding the assets subject to depreciation, the information on the depreciation computations made in line with related regulations and the inflation adjusted amounts, the useful lives of the assets and the expertise values for the determination of fair values:

The Bank has obtained expertise reports to determine fair value of its property.

Financial statements for the period ended September 30, 2005 and 2004 are reviewed and for the year ended December 31, 2004 are audited.

Income statement items do not have seasonality. However, restatement of prior period income statement items were made with monthly indices.
